<p>Next Steps <i>All</i></p>	<p>Where do we go from here? What concrete steps can we take to operationalize the Partnership racial equity principles?</p> <p>Ideas previously discussed:</p> <ul style="list-style-type: none"> • Hold conversations with people outside of the organization • Talk to the Steering committee • Potentially hire a facilitator to assist with this shift • Engage with community leaders in the grant writing process and pay them to be consultants. • Do an assessment of current culture to see where we are 		
<p>Participation in Dr. Nowell's Research Project <i>All</i></p>	<p>Make a decision on participating in Dr. Nowell's research project.</p> <p>Dr. Branda Nowell has a research project she would like to see if the task force would be interested in. From Dr. Nowell:</p> <p>I'm teaching a doctoral qualitative research methods class this coming semester. We generally take on a joint qualitative project. One idea I had that I thought may be useful to the workgroup is to look at health partnerships in North Carolina who are seeking to engage community representation about the models they are using, the challenges, lessons learned, etc.</p> <p>Commitment- Partnership leadership participate in key informant interviews to assess partnerships that have engaged community members. The focus would be in understanding the experiences, insights, best practices, etc.</p> <p>Is this something you think the working group might be interested in?</p>
